Chapter 0: Logistics

- CH0.pdf

Chapter1: Preliminaries

- Section 1: Motivation.pdf
- Section 2: Main Components of Machine Learning.pdf
- Section 3: Perceptron Machine.pdf
- Section 4: Deep Neural Networks.pdf
- Section 5: Function Optimization and Gradient Descent.pdf

Chapter 2: Feedforward Neural Networks

- Section 1: Forward Pass through MLPs.pdf

Section 2: Backpropagation.pdf

Section 3: Multiclass Classification.pdf

Section 4: SGD and Generalization.pdf

Chapter 3: Advancing Our Toolbox

Section 1: More on Optimizers.pdf

Section 2: Overfitting and Regularization.pdf

Section 3: Data Preparation Techniques.pdf

Section 4: Standardization and Batch-Normalization.pdf

Chapter 4: Convolutional Neural Networks

Section 1: Introduction to CNNs.pdf

Section 2: CNN Components.pdf

Section 3: Deep CNNs.pdf

Section 4: Training CNNs.pdf

Chapter 5: Skip Connection and Residual Networks

- Section 1: Vanishing or Exploding Gradient.pdf
- Section 2: Skip Connection and ResNet.pdf

Chapter 6: Recurrent Neural Networks

- Section 1: Learning from Sequence Data.pdf
- Section 2: Recurrence with NNs.pdf
- Section 3: Training RNNs.pdf
- Section 4: Gating.pdf
- Section 5: Bidirectional RNNs.pdf
- Section 6: Correspondence Problem and CTC Loss.pdf

Chapter 7: Sequence to Sequence Models

Section 1: Sequence Generation.pdf

Section 2: Encoder-Decoder Architecture.pdf

Section 3: Attention Mechanism.pdf

Section 4: Self-Attention and Transformers.pdf

Chapter 8: Autoencoders

Section 1: Nonlinear PCA.pdf

Section 2: Autoencoding.pdf

Section 3: Variational AEs and Data Generation.pdf
